SUMMARY

MERN Stack Developer with 6 months of internship experience designing and developing full-stack web applications using React.js, Node.js, Express.js and MongoDB. Hands-on experience in RESTful API development, authentication and authorization, CRUD operations, database integration, responsive UI engineering, API integration, debugging and deployment. Worked on applications involving AI-powered features, payment processing, Redis caching, third-party APIs and production workflows. Strong understanding of client-server architecture, asynchronous programming, reusable components and Git-based software development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, React Router DOM, Tailwind CSS, TanStack Query, Axios, Responsive Web Design, Component-Based Architecture
Backend: Node.js, Express.js, RESTful APIs, API Development, API Integration, CRUD Operations, Middleware, Asynchronous Programming
Database & Caching: MongoDB, Mongoose, Redis, Data Modeling, Database Operations, Query Handling, Server-Side Caching
AI & Integration: OpenRouter AI, AI API Integration, AI-Powered Features, Prompt-Based AI Workflows, Third-Party API Integration
Authentication & Payments: JWT, Authentication, Authorization, Protected Routes, bcrypt.js, Razorpay, Payment Gateway Integration
Tools & Deployment: Git, GitHub, Postman, Vercel, Render, Nodemailer, VS Code

EXPERIENCE

Devlupers – MERN Stack Developer Intern Feb 2026 – Aug 2026

- Contributed to full-stack web application development using React.js, Node.js, Express.js and MongoDB across frontend, backend and database layers.
- Engineered responsive React.js interfaces and reusable UI components using Tailwind CSS and React Router DOM for application workflows.
- Developed and integrated RESTful APIs using Node.js and Express.js, implementing CRUD operations, middleware and MongoDB data workflows.
- Implemented JWT-based authentication and authorization with protected routes and secure API access.
- Integrated frontend applications with backend REST APIs using asynchronous JavaScript and handled API responses, errors and integration issues.
- Contributed to feature development, debugging, code improvements and application maintenance using Git and GitHub.

KEY PROJECTS

AstroGanesh – Production Astrology Platform LIVE URL

React.js | Node.js | Express.js | MongoDB | REST APIs | Payment Integration

- Contributed to a production astrology platform by improving customer-facing interfaces, administrative modules and application workflows.
- Engineered reusable React.js components and responsive UI layouts for user-facing features and service workflows.
- Contributed to administrative dashboard modules for platform operations, content management and service workflows.
- Integrated frontend workflows with backend REST APIs and worked on payment and consultation-related application functionality.
- Troubleshot frontend-backend integration issues and supported production feature enhancements and API integrations.

FitAI – AI-Powered Fitness Platform LIVE URL

React.js | Node.js | Express.js | MongoDB | OpenRouter AI | REST APIs

- Engineered a full-stack **AI-powered fitness platform** using React.js, Node.js, Express.js and MongoDB for personalized fitness, nutrition and product recommendation workflows.
- Integrated **OpenRouter AI** to generate **AI-powered workout plans, AI diet plans and AI-based product recommendations** using user inputs and application context.
- Implemented **AI API integration and prompt-based workflows** between the React.js frontend, Node.js backend and external AI services for dynamic personalized responses.
- Engineered reusable React.js components for Profile, Workout, Nutrition, Progress, Shop, Cart, Orders and Checkout workflows.
- Implemented authentication, protected routes and user-specific workflows with token-based access control and REST API integration.
- Designed frontend-backend data flows for user fitness data, AI-generated recommendations and application state management.

MegaMart – Full-Stack Grocery E-Commerce Platform LIVE URL

React.js | Node.js | Express.js | MongoDB | Redis | Razorpay

- Engineered a full-stack grocery e-commerce platform using React.js, Node.js, Express.js and MongoDB with product, category, cart, wishlist and order management workflows.
- Designed and implemented RESTful APIs for products, categories, subcategories, cart, wishlist and orders with protected resources.
- Implemented JWT-based authentication and authorization for secure user sessions and protected e-commerce operations.
- Integrated **Redis caching** for frequently accessed application data to optimize backend data retrieval and reduce repeated database operations.
- Integrated **Razorpay payment gateway** for online payment processing and implemented payment-success order workflows.
- Implemented **Nodemailer** transactional email workflows and administrative CRUD operations for product and category management.
- Built responsive React.js interfaces using Tailwind CSS for product discovery, search, filtering, cart, wishlist, checkout and order workflows.
- Configured production deployment using Vercel for frontend and Render for backend services.

Library Management System LIVE URL

React.js | Node.js | Express.js | MongoDB | JWT | REST APIs

- Engineered a full-stack library management system using React.js, Node.js, Express.js and MongoDB for book, user and wishlist management.
- Designed and implemented RESTful APIs for authentication, user management, book management and wishlist operations.
- Implemented JWT-based authentication, authorization and protected API resources for secure application access.
- Implemented CRUD operations with server-side pagination, search, filtering and sorting for efficient data retrieval.
- Implemented age-group filtering and query-based data retrieval using Express.js request parameters and MongoDB operations.
- Developed reusable React.js components and responsive interfaces using Tailwind CSS with frontend-backend API integration.

EDUCATION

University of Allahabad Expected Graduation: 2027

Bachelor of Commerce (B.Com.) *Prayagraj, Uttar Pradesh*
